Capture Toolbar

Click on the **camera icon**  to bring up the **screen capture toolbar**. This toolbar will float over top of ALL windows so that you can access the screen capture feature while working in ANY application.

Extraordinary made simple™ | SMART.

Capture Toolbar

Area capture  : press on the screen and, **using constant pressure**, drag a square around the object or area that you want to capture. **When you release the pressure on the SMART Board**, Notebook will take a picture and insert it into your file. Try capturing a portion of your desktop or a portion of an internet window.

Window capture  : press inside the window you want to capture. Release the pressure once the desired window appears as a hatched area. Notebook will capture the hatched area.

Screen capture  : navigate to the screen that you want to capture. A single press will capture the entire screen.

Freehand Capture  : Press and drag to create a freehand shape around the area that you want to capture. Release pressure once the desired area is selected.

Tip: Checking the **'capture to new page'** box  allows you to control where the captured image is displayed.

Extraordinary made simple™ | SMART.

Capture Toolbar

Can you find 3 hidden creatures?

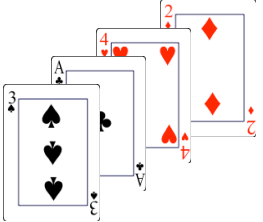

Extraordinary made simple™ | SMART.

Try it! Use the Capture Toolbar to do the following:

1. Open Safari and capture the HCS icon on the left corner. Use free hand capture or area capture.
2. Use Full Screen Capture. Click on the icon to see what happens!
(To delete your new slide, just select the slide in the slide sorter and press delete)
3. Use Window Capture. Make sure Safari is open but not minimized and that it is still visible on the side. (It should be behind this notebook page.) When the camera appears, click on the Internet page. The Internet window should appear on a new slide.

Layering

Layer the following cards in increasing numerical order.

Objects in NB are layered in the order that they were created. To change the order of an object, tap on the object and select **order** from the drop down menu . **Send backwards** will take the object one layer backwards while **send to back** will take the object all the way to the back in one step. The same is true for **bring forward** and **bring to front**.

Layering

Find the vowels and drag them into the bowl.
Throw the consonants in the trash.

q f z h k u v r y l n a t p
d b x w i e c s m

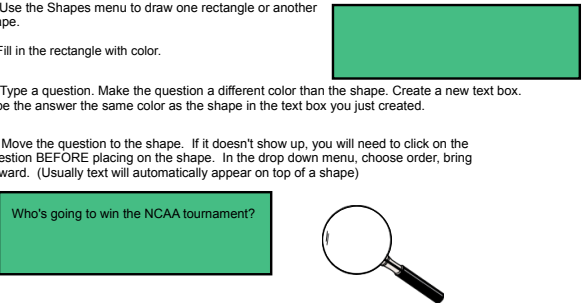

How many vowels did you find?

Move to check answers!

Extraordinary made simple™ | SMART

Layering ~ Try It!
(Use Dual Page to see directions and blank page at the same time.)

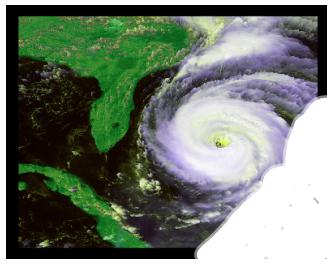

1. Use the Shapes menu to draw one rectangle or another shape.
2. Fill in the rectangle with color.
3. Type a question. Make the question a different color than the shape. Create a new text box. Type the answer the same color as the shape in the text box you just created.
4. Move the question to the shape. If it doesn't show up, you will need to click on the question BEFORE placing on the shape. In the drop down menu, choose order, bring forward. (Usually text will automatically appear on top of a shape)
5. Search for a magnifying glass in the gallery. Do not choose the transparent magnifying glass. Try moving the magnifying glass over the place of the answer. What happens?
6. Click on the magnifying glass and choose order, send backward. What happens when you move it to the answer now?

Erase and Reveal

Select a pen from the toolbar and customize it so that it matches the background color. Now use this pen to draw over top of the image. Use the eraser to erase the pen and reveal the picture that is hidden underneath.

Extraordinary made simple™ | SMART

Erase and Reveal

Take turns naming the body parts. Erase  to reveal the answer.

Hide and Reveal

Question	Answer
What are the three states of matter?	
If an animal eats both plants and animals we call it an....	

Extraordinary made simple™ SMART

Hide and Reveal ~ Try It!
(again, use dual screen to see directions and have the blank page)

1. Create a shape.
2. Add color to the shape.
3. Type move to reveal. Hold the shift key and click on the shape and the words "move to reveal". Then click on draw, group in the menu bar. This locks the star and the text together.
4. Now type something else. Anything that will fit behind the shape.
5. Use layering/ordering to get the text behind the shape. You can send the shape to the front, or send the text to the back.

Working with Sounds

http://www.thesimpsons.com/bios/bios_family_homer.htm

Sounds must be MP3 format. Click on image to which you want to attach the sound. From drop-down menu, select **Sound**. Select **'Browse'** to locate the file on your computer. You can choose to have the **'object'** as the link or select **'Corner Icon'** and small icon will appear in the lower left corner of the image.
